

MANUEL DIAZ

FullStack Developer

+1 (929) 548-7825 • anueliazme98@gmail.com • Istanbul, Turkey

Summary

I help startups build and improve SaaS, marketplace, and AI-powered web applications using React, Next.js, Node.js, and modern product-focused technologies. My focus is not just writing clean code, but building products that are stable, fast, and easy to scale.

Experience

McGraw Hill Copenhagen

Copenhagen, Denmark

FullStack Developer

04/2024 - 06/2026

Smartbook 2.0 – learning tool designed for pre-lecture preparation. Used by 400,000 users daily.

<https://www.mheducation.com/highered/connect/smartbook.html>

- Designed the frontend architecture and technical direction starting from 2024.
- Passed the VPAT annual audit for two consecutive years to ensure long-term accessibility compliance for the application.
- Implemented the migration to an NX monorepo, reducing code duplication by approximately 20% and accelerating the development of features and utilities across the platform.
- Optimized the release process to reduce release times by 40% and resolved team delays caused by merge freezes.
- Introduced Playwright-based end-to-end testing, improving test reliability by 3x and execution time by 10x compared to the existing Protractor setup.
- Implemented a translation and i18n pipeline using BabelEdit, enabling efficient localization management.

Raiffeisen Bank Online

Moscow, Russia

Senior FrontEnd Developer

06/2021 - 04/2023

Raiffeisen Business Online (RBO) – digital banking platform designed for businesses and entrepreneurs, serving Raiffeisen Bank's business customer base.

<https://raiffeisen.ua/en/aem/biznesu/onlain-servisy/raiffeisen-business-online.html>

- Developed and maintained customer-facing financial applications (customer onboarding, loan application flows, and account management features) using React, TypeScript, Redux, styled-components, and Jest, supporting digital banking workflows and credit products.
- Improved application form experiences by analyzing user behavior through Google Analytics, proposing UX improvements, and implementing validated product changes.
- Developed and maintained frontend services while collaborating with backend engineers on Java/Spring microservices integration. Improved development workflows by optimizing GitLab CI/CD pipelines, documentation processes.
- Created technical documentation in Confluence and contributed to UI component library improvements and bug fixes.

Skills

Languages: TypeScript • JavaScript • HTML5 • CSS3 • PHP • Python

Frontend: React • Next.js • Laravel • WordPress • Tailwind CSS • Bootstrap • Responsive Design

Backend: Node.js • Express • Django • Java/Spring • FastAPI • OpenAI API

Database: PostgreSQL • MySQL • MongoDB • Redis

DevOps & Cloud: GitLab CI/CD • AWS • Docker • Kubernetes

Training / Courses

Savanci University - Istanbul, Turkey | 2016-2020

Master's degree -Computer Science and Engineering

Courses: AWS Cloud Fundamentals
